Your Outpatient Arthroplasty Solution

Optimized Instrumentation

Custom Quick Tray™ for TKA to accommodate all surgeon-specific instruments in *one* tray

Pre-Op Patient Engagement

Patient resource app to facilitate pre-op surgical preparation and joint care education

Case Planning

X-ray based, "AI-powered" technology for accurately determining patient implant size range

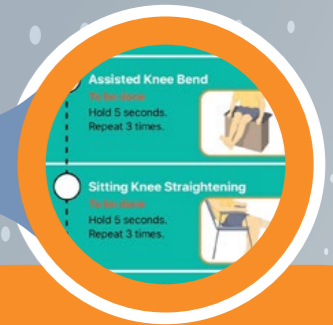

Logistics

"Just-in-time" delivery of patient-specific inventory in *one* tote eliminating on-site storage

Operational Efficiency

Quicker OR set-up and faster room turnover
Greater surgical procedure volume per room
More cost-efficient cases with affordable, case-based accessories

Post-Op Patient Recovery Program

App-based recovery program to support telemedicine
Patient-reported outcome measures to support bundle reporting

customize | optimize | accelerate

- *One Quick Tray™* for TKA with no compromises on approach and implant selection.
- Meticulous case planning aided by *QRS Sizer™* and *Marker™* reduces inventory burden.
- The seamless integration of *QRS®* process creates day-to-day efficiencies leading to greater patient throughput.

Maxx's QRS® yields an estimated 61% to 69% processing cost savings¹
